#### **EDUCATION**

# RMIT University Vietnam

Bachelor of Infomation Technology in Artificial Intelligence; GPA: 3.50

Seattle Central College

Associate of Liberal Arts and Sciences; GPA: 3.00

Ho Chi Minh City, Vietnam Oct. 2020 – Expected: Mar. 2025 Seattle, WA, United States Sep. 2016 – Aug. 2017

Email: miketvo@outlook.com

Mobile: (84)-385-892-705

## Relevant Coursework

Artificial Intelligence, Machine Learning, Practical Data Science, Data Structures and Algorithms, Software Engineering Design, Computing Theory, Calculus I, Fullstack Development, Database Application

#### **PROJECTS**

## Flower Classification and Recommendation System

- ↑ miketvo/rmit2023a-cosc2753-assignment2 | Dataset: Kaggle miketvo/rmit-flowers
  - o Languages and Frameworks: Python, Keras, Tensorflow, Scikit-Learn, Pillow
  - Model Development and Deployment: Developed an in-house CNN solution for feature extraction and a robust flower image classification and recommendation pipeline with an accuracy score of 0.7.
  - Leadership: Led student research team to produce a high-quality research paper on the subject matter.

### Sepsis Prediction Model

niketvo/rmit2023a-cosc2753-assignment1 | Dataset: Kaggle - chaunguynnghunh/sepsis

- o Languages and Frameworks: Python, Scikit-Learn, Pandas, Seaborn
- $\circ$  **F1 Score**: Achieved a  $F_1$  score of 0.86 using a customized Bagged Tree model and robust data cleaning and preprocessing pipeline.

# Imdupes

Open-source versatile image deduplicator inspired by fdupes | • miketvo/imdupes

- o Languages and Frameworks: Python, PyInstaller, Pillow, NumPy
- Innovative Perceptual Hashing: Achieved high-performance differentiating capability for images with transparency and minor differences by developing an in-house image hashing alogrithm that utilizes both traditional perceptual hashing techniques and color histogram.
- **Deployment**: Successfully deployed the application on Homebrew and Scoop package managers for quick-and-easy cross-platform installation process on MacOS, Linux, and Windows.

## Open Source Vietnamese Keyboard for Keyman Input Method Editor

🕥 miketvo/keyboards | 🏶 Keyman - Vietnamese Telex | 🏶 Keyman - Vietnamese VNI

- o Languages and Frameworks: Python, Keyman Keyboard Language
- Exhaustive Vietnamese Keystrokes Generator: Utilized Python scripting to generate exhaustive syllable-based Telex and VNI keystrokes configurations for the Keyman Keyboard Language from scraped dictionary of Vietnamese word.
- Open-source Collaboration: Collaborated via GitHub with Keyman developers, managers, and user community to address bugs and deployment issues on Keyman App's established architecture.
- **Deployment**: Both Telex and VNI versions combined achieved over 34,000 downloads in total on Keyman website.

#### $\mathbf{DsvCol}$

Open-source cross-platform CLI-application pretty-printing delimiter separated value files | • miketvo/dsvcol • Languages and Frameworks: C, CMake, Bash, PowerShell

# Online Client Portfolio

# duonghanhi.netlify.app

- Languages and Frameworks: JavaScript, Gatsby, PostCSS
- **UI/UX Design**: Worked remotely with the client to design and develop a user-friendly and brand-concious UI/UX using Agile project managament methodologies.

# SKILLS

- Languages: Python, SQL, Java, C/C++, JavaScript, HTML/CSS, Lua, Bash, TeX
- Technologies: Tensorflow, Keras, OpenCV, Pandas, React, Gatsby, NextJS, Vite, Express, MongoDB, MySQL
- Tools: Git, Vim, Visual Studio Code, Jupyter Lab, Jupyter Notebook, Jetbrains IDEs, Linux, Jira
